1. Introduction

With this module you can set up email alerts on the email addresses of your choice when a new customer is registered on the store.

1.1 Functionality

- Add one or many recipient e-mails to the new customer account notification
- Add one or many BCC recipient e-mails to the new customer account notification
- Option to send a notification email each time a customer changes or updates their address or profile information
- All account informations are displayed in the notification email
- Easy installation

1.2 SAV

[Contact technical support.](#)

2. Installation

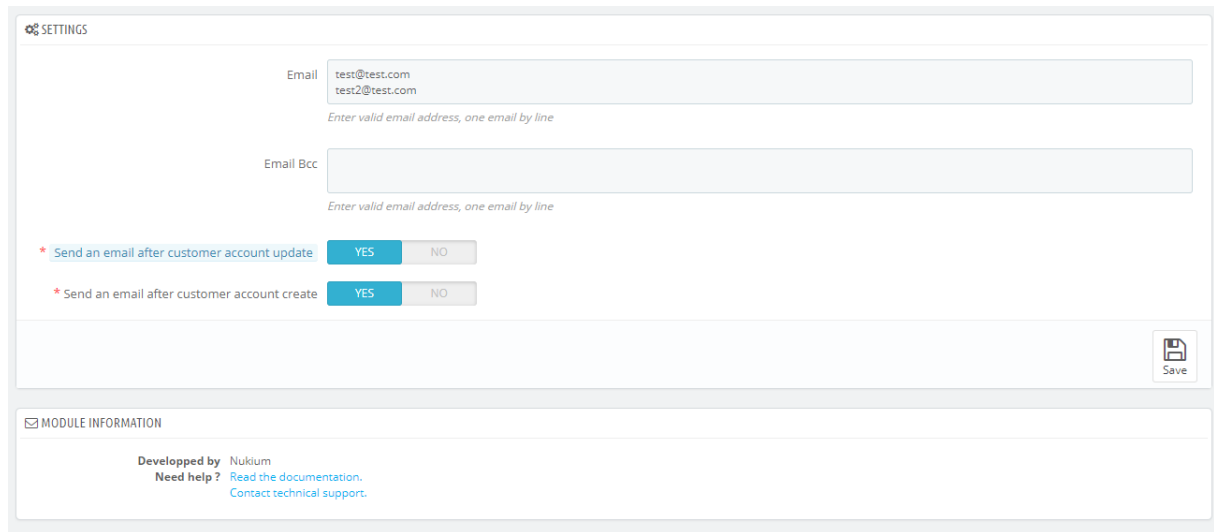

The installation of the module proceeds as follows :

1. Go to the "Modules and Services" tab of your back-office and click on "Add a new module"
2. Choose the zip file and then click on "Upload this module"
3. The module is now available on the modules list, click on "Install" and follow the steps
4. Configure the module as you want.

3. Configuration

3.1 View of the configuration interface

The screenshot shows a configuration interface with a header 'SETTINGS' and a 'Save' button. The main section contains two email input fields: 'Email' and 'Email Bcc'. The 'Email' field has two lines of text: 'test@test.com' and 'test2@test.com'. Below the 'Email Bcc' field is a placeholder text: 'Enter valid email address, one email by line'. There are two toggle switches: 'Send an email after customer account update' (set to YES) and 'Send an email after customer account create' (set to YES). The bottom section is titled 'MODULE INFORMATION' and contains the text: 'Developped by Nukium', 'Need help? Read the documentation.', and 'Contact technical support.'

3.2 Activation of notifications

Simply fill in the email addresses to receive notifications and save the configuration page. Make sure the module is enabled to receive notifications.

3.3 Email example

JOHN DOE HAS CREATED AN ACCOUNT,
MORE DETAILS ARE PROVIDED BELOW.

- Email : john_doe@testdomain.com
- Firstname : john
- Lastname : Doe
- Date of birth : 1999-6-4
